AKINFALA GBEMINIYI

Flutter Developer | Mobile Application Engineer

DETAILS

Email:

gbeminyiakinfala@gmail.com

Phone:

+2348134697172.

TECHNICAL SKILLS

Mobile Development:

- Flutter (Advanced)
- Dart
- State Management (Provider)
- Responsive UI Design
- Custom Widget Architecture
- Animation & Interactive UI Implementation

Backend & Integration:

- REST API Integration
- Supabase , Firebase (Authentication, Database, Role-Based Access)
- Golang API Integration
- JSON Serialization & Data Modeling
- Role-Based Authorization Logic
- Email & OTP Verification Workflows

Frontend & Web:

- HTML
- CSS
- JavaScript
- Next.js (Working Knowledge)
- TypeScript (Working Knowledge)

PROFESSIONAL SUMMARY

Results-driven Flutter Developer with hands-on experience building secure, scalable, and production-ready mobile applications. Skilled in designing and implementing responsive user interfaces, state-managed architectures, API integrations, and role-based access systems.

Proven ability to translate complex product requirements into functional, high-performance applications with strong emphasis on usability, security, and clean code structure. Experienced in developing fintech-style wallet systems, social engagement features, event-driven applications, and structured access-control workflows.

Strong background in Flutter, Dart, REST API integration, state management, and UI/UX implementation. Adept at collaborating with backend services including Supabase, Firebase and Golang APIs, implementing authentication flows, OTP verification systems, and secure data handling.

Committed to writing maintainable code, improving application performance, and delivering reliable digital solutions.

PROFESSIONAL EXPERIENCE

Flutter Developer
Astravest App – Lagos.
August 2025 – Present

- Develop and maintain cross-platform mobile applications using Flutter, Firebase, and custom backend services.
- Integrate secure RESTful APIs and implement structured data models to ensure seamless communication between frontend and backend systems.
- Contribute to custom API development and assist in server configuration to support scalable application performance.
- Implement secure authentication workflows, including OTP verification and role-based access control mechanisms.
- Design and build modular, reusable UI components to maintain consistency and improve development efficiency.
- Collaborate with product managers, backend engineers, and designers to deliver feature enhancements and performance optimizations.
- Conduct debugging, testing, and performance tuning to ensure application stability and responsiveness.

Flutter Developer & UI/UX Designer Intern
OS Concepts Research and Consulting Limited – Abuja
January 2024 – June 2025

- Developed and maintained mobile applications using Flutter and Dart with emphasis on responsive layouts and cross-platform compatibility.
- Integrated backend services using REST APIs and MySQL databases, optimizing data flow and improving application performance.
- Designed wireframes and prototypes using Figma, translating user requirements into intuitive and user-friendly mobile interfaces.
- Conducted user research, usability testing, and feedback analysis to refine digital products, contributing to improved user engagement across deployed applications.
- Implemented structured state management and clean architecture principles to enhance scalability and maintainability.
- Collaborated with multidisciplinary teams to deliver production-ready digital solutions across multiple projects.

Tools & Platforms:

- Git & GitHub
- Postman
- Figma (Wireframing & Prototyping)
- Excel (Data Management & Reporting)
- Android Studio
- VS Code (Knowledge)

CORE COMPETENCIES

- Clean Code Architecture
- Problem Solving & Debugging
- Performance Optimization
- UI/UX Implementation
- Secure Workflow Design
- API-Driven Application Development
- Cross-Functional Collaboration

Selected Project Experience

Visitor Management System (Security & Access Control Platform)

- Designed and implemented a secure visitor registration and approval workflow system.
- Built OTP-based email verification for identity validation and access control.
- Developed role-based access control architecture for administrators, security personnel, and reception users.
- Structured secure data storage and visitor tracking for audit and compliance purposes.
- Implemented responsive UI optimized for gate-level operations and mobile device usage.
- Conducted end-to-end workflow testing from visitor registration to approval and access logging.

Backend & API Collaboration

- Worked with Golang-based APIs for backend service integration.
- Configured API endpoints for authentication, data retrieval, and transactional services.
- Conducted end-to-end workflow testing for user registration, approval systems, and transaction flows.
- Implemented backend email validation logic for secure user onboarding.
- Assisted in SQL migration processes and authentication flow adjustments.

EDUCATION

POLYTECHNIC IBADAN, OYO STATE, NIGERIA, NATIONAL DIPLOMA IN GEOLOGY

March 2012 - September 2014.

ADEKUNLE AJASIN UNIVERSITY, AKUNGBA AKOKO, ONDO STATE, NIGERIA, B.S.C. IN ANIMAL AND ENVIRONMENTAL BIOLOGY

January 2017 – October 2023.
